

You want to stop at the roadside, but there are several road users behind you. How can you show them that you intend to stop?

☒ **Whatever sort of car I am driving, I brake gently in good time.**

Keeping to the right and slowing down are clear signs that you intend to stop. You can also indicate right but it is not a must.

☐ If I am driving a manual car, I go into neutral in good time.

☒ Whatever sort of car I am driving, I engine brake in good time.

☐ If I drive an automatic car, I go into P (Parking). It makes the brake light shine.

☐ I switch on the car's hazard warning lights.

What is engine braking?

☐ When I change to a lower gear and disengage the clutch

☐ When I change to a higher gear and disengage the clutch

☐ When I brake at the same time as I disengage the clutch

☒ **When I release the accelerator**

Engine braking (coming off the gas and or change to a lower gear) reduces fuel consumption.
