**Question 1 of 10**  
Körställning

What must you remember when driving a vehicle with air bags?

☒ To hold the steering wheel correctly with both hands.

The photograph shows air bags inflated to the size they are in a collision. An air bag is a balloon that is intended to rapidly fill with air or gas when there is a collision. This is to protect the people in the vehicle. People less than 140 cm tall are not allowed to sit in a seat where there is an air bag. A backward-facing child car seat must not be placed next to an air bag that has not been deactivated.

☐ That I do not need to wear a seat belt.

☒ To sit at least 45 cm from the steering wheel.

**Question 2 of 10**  
Körställning

What is the most important reason for correctly adjusting your seat before driving?

☐ Giving people in the back more room.

☒ **Reaching the pedals properly.**

When you drive, you must be able to reach your pedals properly. It must be possible to carry out emergency braking firmly. If you are driving a long way, tiredness is also a factor. You use a lot more effort if you are sitting either too far from or too near your vehicle's primary controls. Sitting too near the steering wheel can also be dangerous if the air bag goes off, adjust the steering wheel too.

☐ Not becoming tired as quickly.

☐ Reaching the steering wheel.

Road signs

Your car is equipped with an airbag. What is the minimum recommended distance between the steering wheel and your body?

☐ About 15 cm

☒ About 25 cm

If you sit very close, or very far from the steeringwheel, there is a risk that the airbag doesn't give you the best protection if an accident should occur.

☐ About 50 cm

☐ About 70 cm

Which of the following statements about seat belts is true?

A seat belt combined with a thick jacket reduces loading on the body in the event of a collision

**A seat belt should lie close to the body and be as tight as possible**

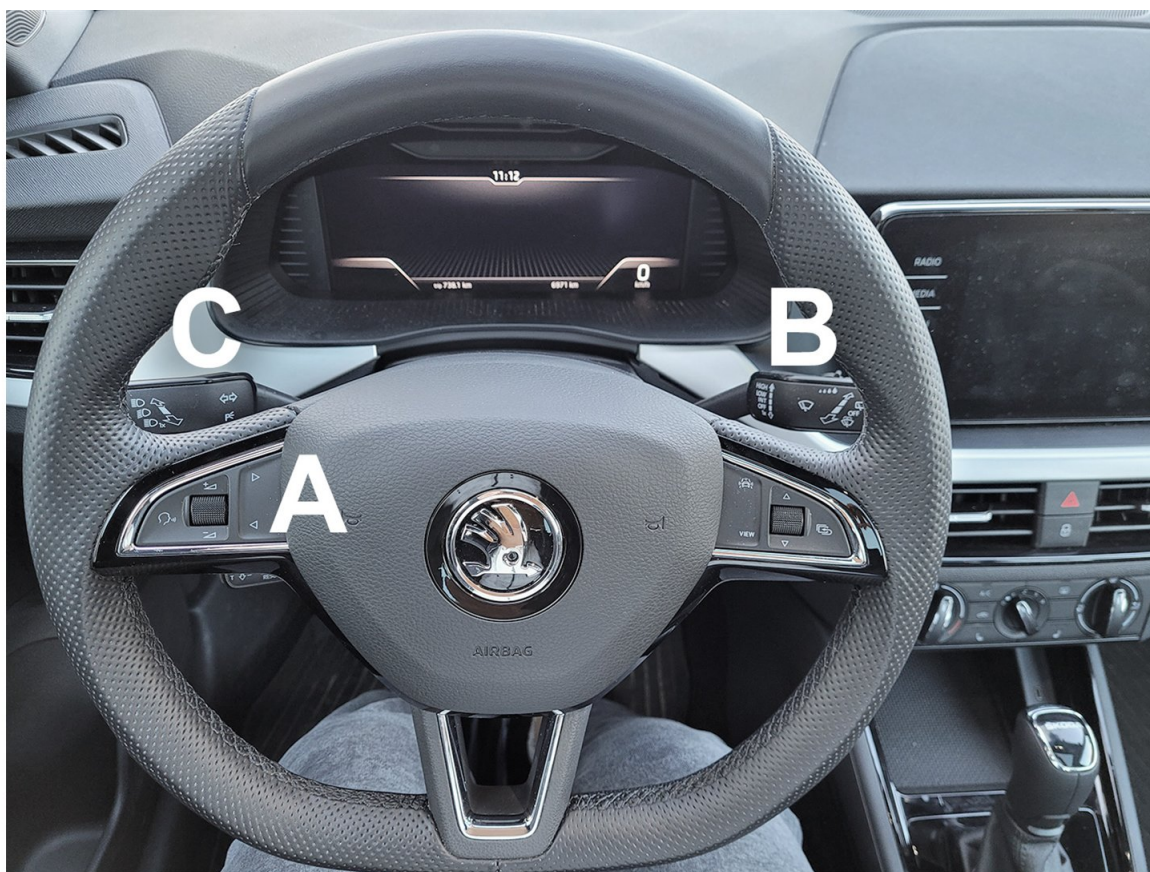

The tighter the seatbelt sits on the body, the more quickly the body is held in place. Open your thick wintercoat and get the belt close to your body

You do not need to use your seatbelt if you drive on a road that has the maximum speed of 30 kph

Which of these controls is for the indicators?

☐ A.

☒ B.

☐ C.

You must use indicators (direction indicators) when you are going to: pull out from the roadside; turn; and, change lanes or, in some other not insignificant way, move your vehicle to the left or the right.

Do you have to wear a seat belt when travelling in a taxi?

Yes, but only if we drive on a country road or a highway. In city driving it's not necessary

Yes, I do

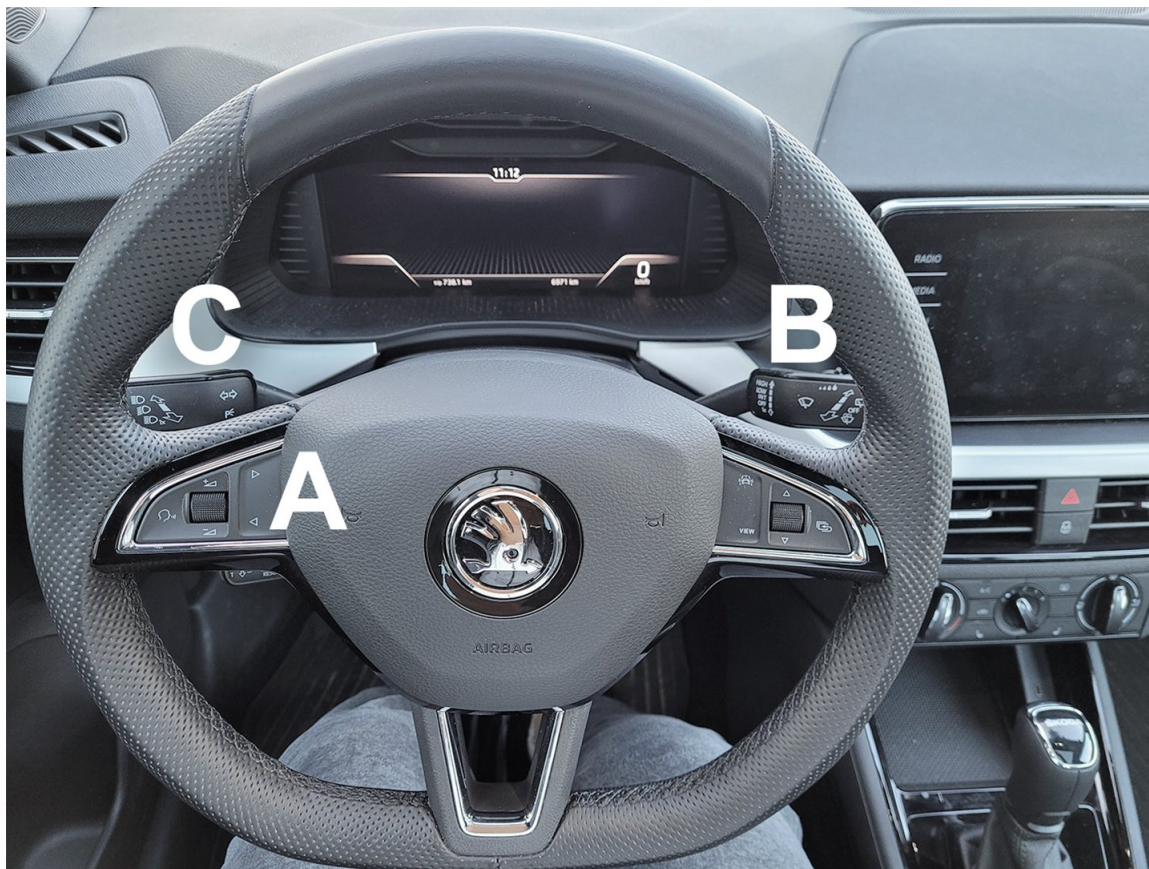

You must use a seatbelt when travelling in an engine-powered vehicle. There are only a few exceptions. One of these is on parking lots.

No, I don't

Which of these controls is for the windscreen wipers?

☐ A.

☒ B.

Windscreen wipers wash and dry your windscreen and, perhaps, your rear window. In certain vehicles, it can also wash the headlights.

☐ C.

In which order should you adjust your sitting position in your vehicle?

☒ Adjust the seat and steering wheel, adjust mirrors, put on my seat belt.

When you adjust the seat, you most probably also need to adjust the mirrors. Thus, it is easiest to first adjust the seat and then the mirrors. You put your seat belt on before you drive off.

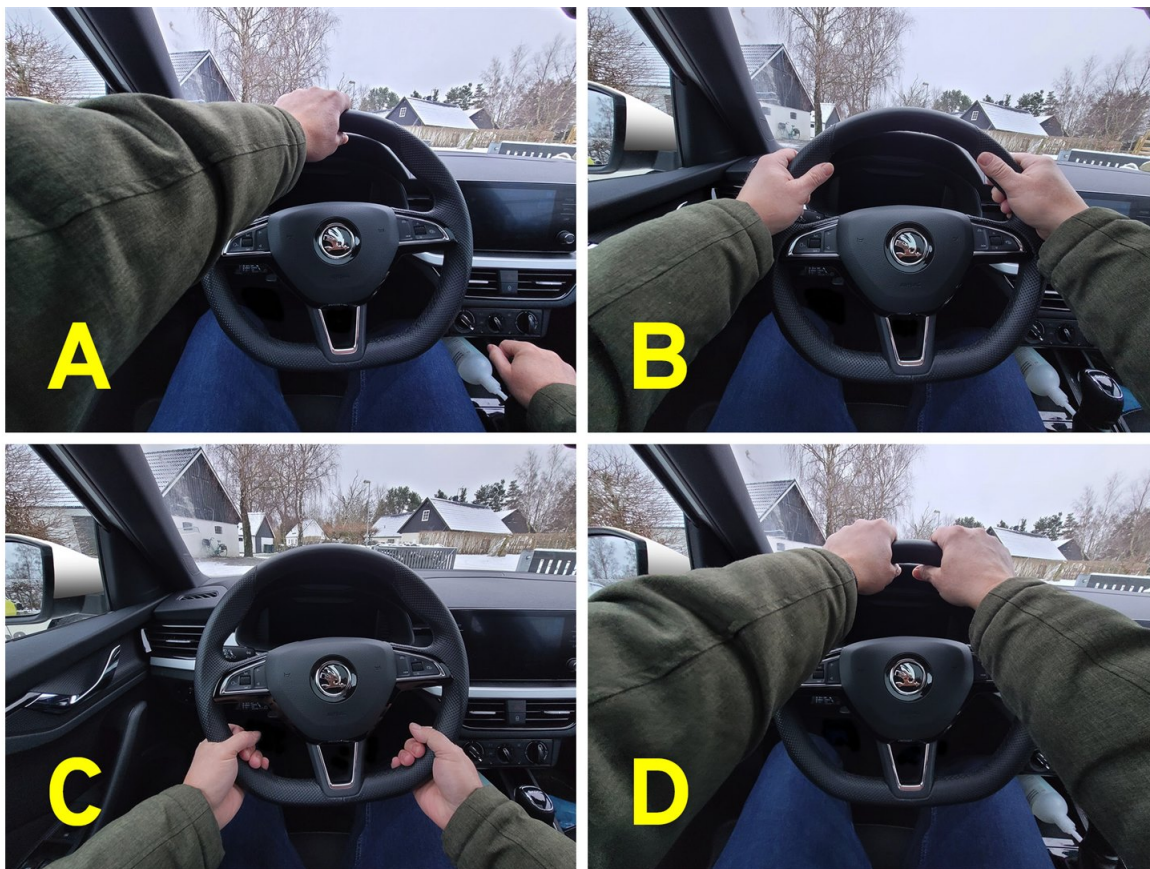

☐ Adjust mirrors, adjust the seat and steering wheel, put on my seat belt.

☐ Put on my seat belt, adjust the seat and steering wheel, adjust mirrors.

Which way of holding the steering wheel is the safest?

☐ A.

☒ B.

So that you can steer freely and so that your hands will not be in the path of the air bag, you should position your hands as in B.

☐ C.

☐ D.
